

No Page Like Homepage

This is “citatel”, home of what started as the “tactile” TTRPG system. You can learn more about the game [here](#). The [GitHub repo](#) includes the code for the site itself, as well as all of the tooling and data used to generate enemies, weapons, etc.

The site is set up so you can read through the whole thing starting at [About](#) like a book. Eventually this should all be a physical honest-to-god-book in addition to being a website.

Beta

Ikolith Consolidated Recreation is currently in “stealth mode”. Click [here](#) to get our beta.
